Second Floor

Wall of Windows & Room to Spread Out

This home's signature is its vaulted living and dining areas, which share a wall of glass for outside views that can also be enjoyed from the large gourmet kitchen. Two large bedrooms on the main floor share a bathroom. The master suite shares the upstairs with a loft and includes dual closets as well as an office/master retreat. The master bathroom features a whirlpool, double sink vanity and 5' shower with dual showerheads. This plan's square footage includes the office/master retreat and closets above the garage, built on-site. The area above the garage is 379 sq ft and could be finished as a bonus room as your budget allows (making the home 2,411 sq ft).
